

GETRONICS ENVIRONMENTAL POLICY

Getronics recognises that the principles of effective environmental management are important to sound business management. Consequently, it is our policy to safeguard and, where practical, enhance those aspects of the environment which are under the control of the Organisation or affected by its operations.

In order to demonstrate commitment to continual improvement of the Company's environmental performance, the organisation will:

- Commit to the prevention of pollution from our activities
- Ensure compliance with all applicable environmental legal requirements as well as any other environmental requirements to which the organisation subscribes
- Identify key environmental impacts associated with our business practice, set objectives and targets for improvement and avoid, reduce or control such impacts wherever practicable
- Use energy, materials and natural resources efficiently and in a more sustainable manner
- Provide knowledge to company staff concerning aspects of their work which contribute to the Company's environmental impacts
- Produce and make publicly available an environmental policy
- Review the policy on a regular basis in order to ensure its continued applicability.

In order to fulfil these commitments, and to provide the level of control and traceability necessary to demonstrate compliance with recognised processes, it is the policy of the organisation to establish and maintain an efficient and effective Environmental Management System (EMS) based upon the requirements of the BS EN ISO 14001 Environmental Management Systems Standard.

This Policy and the EMS are regularly reviewed and where necessary revised to ensure that they are continually improved.
